Package 'limmaGUI'

March 28, 2025

Version 1.83.0

Date 2018-09-28

Title GUI for limma Package With Two Color Microarrays

Author James Wettenhall [aut], Gordon Smyth [aut], Keith Satterley [ctb]

Maintainer Gordon Smyth <smyth@wehi.edu.au>

Imports methods, grDevices, graphics, limma, R2HTML, tcltk, tkrplot, xtable, utils

Description A Graphical User Interface for differential expression analysis of two-color microarray data using the limma package.

License GPL (>=2)

Contents

LGchangeLog *LimmaGUI Change Log*

Description

Write as text the most recent changes from the limmaGUI package changelog.

Usage

```
LGchangeLog(n=20)
```

Arguments

n	integer, number of lines to write of changelog.

Value

No value is produced, but a number of lines of text are written to standard output.

Author(s)

Gordon Smyth

Arguments

BigfontsForlimmaGUIpresentation	If set to TRUE, larger fonts are used. However, some font sizes are not controlled by limmaGUI and so must be adjusted in the operating system, e.g. in the Control Panel in Windows under Display, Appearance.

Details

This function launches a Graphical User Interface for the limma package by Gordon Smyth. The GUI uses Tk widgets (via the R TclTk interface by Peter Dalgaard) in order to provide a simple interface to the limma functions for linear modelling of microarrays and identification of differentially expressed genes.
