

Package ‘beta7’

April 2, 2026

Version 1.48.0

Date 2005-10-19

Title Rodriguez et al. (2004) Differential Gene Expression by
Memory/Effector T Helper Cells Bearing the Gut-Homing Receptor
Integrin alpha4 beta7.

Author Jean Yang <jean@biostat.ucsf.edu>

Maintainer Jean Yang <jean@biostat.ucsf.edu>

Description

Data from 6 gpr files aims to identify differential expressed genes between the beta 7+ and beta 7-
memory T helper cells.

-------	--

Description

This data package contains an marrayRaw instance for the as well as 6 gpr files of the beta7 mi-
croarray experiment.

Usage

```
data(beta7)
```

Details

Each arrays(hybridization) involved $\beta7+$ cell RNA from a single subject (labeled with one dye) and $\beta7-$ cell RNA from the same subject (labeled with the other dye). Target RNA was hybridized to microarrays containing 23,184 probes including Operon Human version 2 set of 70-mer oligonucleotide probes and 1760 controls spots (e.g. negative, positive and normalization controls spots).
