

# Package ‘cMap2data’

December 12, 2024

**Type** Package

**Title** Connectivity Map (version 2) Data

**Version** 1.43.0

**Date** 2012-07-24

**Author** C. Pacini

**Maintainer** J. Saez-Rodriguez <saezrodriguez@ebi.ac.uk>

**Description** Data package which provides default drug profiles for the DrugVsDisease package as well as associated gene lists and data clusters used by the DrugVsDisease package.

**License** GPL-3

**biocViews** Homo\_sapiens\_Data, MicroarrayData, GEO

**LazyLoad** yes

**LazyData** yes

**Depends** R (>= 2.10)

**git\_url** <https://git.bioconductor.org/packages/cMap2data>

**git\_branch** devel

**git\_last\_commit** b1b7acf

**git\_last\_commit\_date** 2024-10-29

**Repository** Bioconductor 3.21

**Date/Publication** 2024-12-12

## Contents

cMap2data-package . . . . .	2
cytodrug . . . . .	3
drugClusters . . . . .	4
druglabels . . . . .	5
drugRL . . . . .	5
genelist . . . . .	6

<b>Index</b>	<b>7</b>
--------------	----------

cMap2data-package      *cMap2 Data Package*

---

## Description

Data package to provide default ranked profiles, clusters and Cytoscape <http://www.cytoscape.org/> file format for the DrugVsDisease package. The data is from drug screenings in the connectivity map (version 2) which is a project based at the Broad Institute of MIT and Harvard in Cambridge, Massachusetts (USA).

## Details

Package:	cMap2data
Type:	Package
Version:	0.99.0
Date:	2012-09-20
License:	GPL-3
LazyLoad:	yes

Data loaded automatically in the DrugVsDisease package.

## Author(s)

C. Pacini

Maintainer: Julio Saez-Rodriguezsaezrodriguez@ebi.ac.uk

## References

## Examples

```
#load the gene Ranked lists:  
data(drugRL)
```

---

cytodrug	<i>Cytodrug data frame</i>
----------	----------------------------

---

**Description**

Data frame containing information for input into Cytoscape SIF file format. Contains the connections between the affinity propagation clustering of the drug profiles.

**Usage**

```
data(cytodrug)
```

**Format**

A data frame with 1309 observations on 4 variables.

**Details**

Columns 1 and 2 contain the names of the nodes connected in the network. The third have the distances according to the GSEA scores and the fourth column is edge type the Running sum Peak Sign (RPS) for which 1 denotes positive correlation and (-1) a negative correlation.

Iorio et al. (2010) Discovery of drug mode of action and drug repositioning from transcriptional responses. *PNAS*, 107(33), 14621- 14626.

**Examples**

```
data(cytodrug)
```

---

`drugClusters`*Drug Clusters Matrix*

---

**Description**

Containing the names of the drug profiles and the numbers of the clusters for each node, as determined by affinity propagation clustering using GSEA scores for similarity matrix. The drug profiles are derived from the Connectivity Map version 2 which is a project based at the Broad Institute of MIT and Harvard Cambridge, Massachusetts (USA)

**Usage**

```
data(drugClusters)
```

**Format**

A data frame with 1309 observations on 2 variables.

**Details**

A Data frame containing the names of the compounds in the DvDdata reference set in the first column. The second column contains the cluster they were assigned to using GSEA to calculate similarity between profiles used as input into affinity propagation clustering.

**Examples**

```
data(drugClusters)
```

---

druglabels	<i>Drug name maps to Drug Bank</i>
------------	------------------------------------

---

**Description**

Data frame containing the names of the compounds in the DvDdata drug profiles, with corresponding names to search the DrugBank [1] database through its web browser.

**Usage**

```
data(druglabels)
```

**Examples**

```
data(druglabels)
```

---

drugRL	<i>Drug Ranked List Matrix</i>
--------	--------------------------------

---

**Description**

Ranked Lists by expression of genes for reference set of drug profiles. These drug profiles are derived from the Connectivity map (version 2) project which is based at the Broad Institute of MIT and Harvard in Cambridge, Massachusetts (USA)

**Usage**

```
data(drugRL)
```

**Details**

A matrix containing the ranked lists of expression profiles for the 1309 drug compounds in the Connectivity Map (version 2) screening. Rows are the genes and the columns contain ranked lists for different drugs. The profiles are in rank decreasing order.

**Examples**

```
data(drugRL)
```

---

genelist

*Gene List Vector*

---

**Description**

List of HUGO genes included in the reference data sets.

**Usage**

```
data(genelist)
```

**Details**

A character vector listing those genes in the reference data sets. Obtained using BioMart annotations of the Affymetrix HGU-133A, HGU-133A2 and HGU-133Plus2 platforms.
