

# JASPAR2018

November 20, 2024

---

JASPAR2018-class

*JASPAR2018 object*

---

## Description

The JASPAR2018 object class is a thin class for storing the path of JASPAR2018 style SQLite file.

## Slots

db: Object of class "character": a character string of the path of SQLite file.

## Author(s)

Ge Tan

## Examples

```
library(TFBSTools)
opts <- list()
opts[["species"]] <- 9606
opts[["type"]] <- "SELEX"
opts[["all_versions"]] <- TRUE
PFMatrixList <- getMatrixSet(JASPAR2018, opts)

opts2 <- list()
opts2[["type"]] <- "SELEX"
PFMatrixList2 <- getMatrixSet(JASPAR2018, opts2)
```

JASPAR2018-package      *Data package for JASPAR 2018*

---

### Description

Data package for JASPAR 2018. To search this databases, please use the package TFBSTools.

### Details

|                   |   |
|-------------------|---|
| Package:          | JASPAR2018  |
| Version:          | 0.99.0  |
| Date:             | 2017-09-21  |
| Depends:          | R (>= 3.4.0), methods   |
| License:          | GPL-2   |
| URL:              | <a href="http://jaspar.genereg.net/">http://jaspar.genereg.net/</a> |
| Type:             | Package   |
| NeedsCompilation: | no  |
| LazyData:         | yes   |
