Package 'spatialDmelxsim'

Title Spatial allelic expression counts for fly cross embryo

Version 1.17.0

Description Spatial allelic expression counts from Combs & Fraser (2018),
compiled into a SummarizedExperiment object. This package contains data
of allelic expression counts of spatial slices of a fly embryo,
a Drosophila melanogaster x Drosophila simulans cross. See the CITATION
file for the data source, and the associated script for how the object
was constructed from publicly available data.

Description

Allelic expression counts of spatial slices of a fly embryo from Combs & Fraser (2018), a D melanogaster x D simulans reciprocal cross
