## Introduction

- Plattform for multimedia installations
- Framework for media presentations
- High-quality visuals
- Alternative to Macromedia Director
- Open source (LGPL)

Contents

## Quick Authoring

Authors need an easy and flexible method of specifying the intended results. Short time intervals between authoring changes and seeing the results are essential.

## High-quality Visuals

- Flexible engine
- Seamless media integration
- High-resolution video playback
- Good font rendering, layout support

Contents

The Future

Wishlist

## High-quality Sound

- CD-Quality, 44.1/48 kHz, 16 bit
- Low latency
- Mixer
- Nice to have: multi-channel playback

Contents

## Hardware/OS Support

- Linux:
  - Low price
  - 'Embedded' support
  - Cloneable systems
  - Legacy hardware support
- Mac OS X:
  - Authoring tools

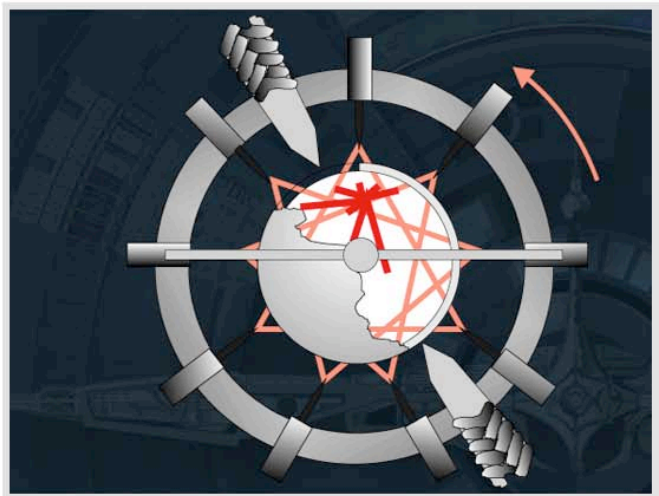

# Openness for Expansion

The potential users of the platform are free-minded, intelligent people who don't like to be fenced in.

- Open source
- Plugin support

Contents

The Future

Wishlist

## Concept

- Separation of static and dynamic content
- xml-based screen layout language
  - Based on svg
  - Hierarchical
- Dynamic behaviour using JavaScript
  - Animations
  - User interaction

Contents

## Example

```
<avg width="640" height="480">  
  <image id="logo" x="0" y="0"  
    href="logo.tif"  
    onmouseover="disappear();" />  
</avg>
```

```
function disappear() {  
  var logoNode =  
    AVGPlayer.getElementById  
      ("logo");  
  logoNode.opacity = 0;  
}
```

## Screen Output

- OpenGL, DirectFB
- Hardware-based rendering
- OpenGL:
  - 3d
  - Good OS support
  - (Comparatively) good driver support
- DirectFB
  - Efficient 2d rendering
  - Linux only
  - Good on low-end systems

Contents

Requirements

Base Technology

Features

Samples

The Future

Wishlist

## Video Support

- libavcodec:
  - Heart of ffmpeg
  - Masses of video formats
  - External video sources
- libdc1394:
  - Industrial cameras
  - Firewire interface

Contents

Wishlist

## Text Output

- libfreetype:
  - Font engine
  - Renders individual characters
- Pango:
  - Text layout engine
  - Used in gnome
  - Supports strange character sets
  - Supports right-to-left-rendering

Contents

The Future

Wishlist

## Display Mixer - OpenGL Backend

- Rendering in hardware
- Rotation
- Subpixel precision
- Additive & subtractive blend modes
- Warping
- Everything adjustable in real time

## Video Support

- Several videos at once
- play/pause/stop at any time using javascript
- seek support
- Framerate synchronized with avg framerate
- Complete integration
- Speed: P4 Mobile 1.6 GHz shows 5 videos
  - ° 352x240 resolution
  - ° 25 fps

Contents

## Input Support

- Mouse/touchscreen:
  - JavaScript handlers for display elements
  - MouseDown/Up/Over/Out/Move
  - Mouse event bubbling
- Keyboard
- Parallel port control lines
- Hack: Soundcard as A/D converter

Contents

The Future

Wishlist

## Authoring

- Complete JavaScript language is available
- Display element properties as js variables:  
(Example: `image.angle += 3.14159`)
- React to user events (preceeding section)
- Timers (`setTimeout`, `setInterval`)
- System call support
- Print to console support
- Javascript base libraries

Contents

Requirements
